Floodplain networking session at conference:

- Creation of a speakers bureau – want to have speakers from throughout the state that can speak to groups outside of INAFSM about floodplain
- Creation of several presentations that the group has that can be given to speakers from speakers bureau to make their own so they don't have to start from scratch. Topics considered include:
  - Floodplain 101 (Floodplain Basics)
  - Elevation Certificates
  - LOMA/LOMR – accuracy and precision of mapping
- Talked about some possible workshops for members
  - High Water Mark Training
  - Tying CRS to stormwater and MS4 efforts – how we can help each other
  - Applying for FEMA grants course

Buck Sheet: This is the start that I currently have:

“Exclusive access to floodplain managers and professionals from across the state that have experience with a multitude of problems and situations related to the floodplain. Value education opportunities provided at low or no cost to you with invaluable networking opportunities.”
